Congratulations on your purchase of DragonFire DragonClaw shoulder harness retainers. 4-Point harnesses are a great way to add comfort and safety to your UTV but they only work if worn correctly. DragonFire has the perfect solution to using after-market harnesses with factory seats to keep your shoulder straps in the perfect spot every time with our DragonClaws!

- Read and understand these instructions before installing product
- This product does not provide roll over protection
- Do not sue if there are signs of damage to product
- Improper installation may result in product malfunction

Tools Required

5/32" Allen Wrench

Disclaimer

Off road activities can be hazardous and could lead to injury, dismemberment, paralysis and death. No warranty of representation is made as to the products ability to protect the user from any injury or death. The user assumes that risk. The acceptance and /or use of this merchandise purchased from DragonFire by the customer hereby shall release DragonFire from any and all liability pertaining to the use of such merchandise.

Step 1: Place vehicle on a flat and level surface. Place gear selector in park and remove keys from the ignition.

Step 2: Locate horizontal cage tube behind seats. Disassemble DragonClaw by removing the two Allen head bolts holding both sides and the claw together. Sandwich the cage tube between two clamp halves ensuring that claw is inward towards the seat. Secure by reinstalling two Allen head bolts.(See Figure A)

Step 3: Install 4-Point harnesses according to manufacturer's instructions and ensure that shoulder straps run through the DragonClaw retainers. (See Figure B). Time to ride and enjoy!

ProTip: Periodically check all hardware and re-tighten if needed. Inspect harnesses for wear and replace if damaged.
